DETAILED ACTION

1. Applicant's amendment filed 10/8/2009 is acknowledged and has been entered. Claims 1-11, 12, 14 have been amended. Claims 34-38 have been added. Claims 21-33 have been canceled. Claims 1-20 and 34-38 are pending. All of the arguments have been thoroughly reviewed and considered but are deemed moot in view of the new grounds of rejections necessitated by Applicant's amendment. Any rejection not reiterated in this action has been withdrawn as being obviated by the amendment of the claims.

This action is made FINAL.

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Previous Rejections

3. The claim rejections under 35 USC 112 second paragraph is withdrawn in view of Applicant's amendment of the claims. The prior art rejections under 35 USC 103(a) as being unpatentable over Dahl et al is withdrawn in view of Applicant's amendment of the claims and arguments at page 13 of the arguments.

New Ground(s) of Rejections

THE NEW GROUND(S) OF REJECTIONS WERE NECESSITATED BY APPLICANT'S AMENDMENT OF THE CLAIMS:

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1637

5. Claims 1-20 and 34-38 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

(a) Claims 1-20 and 34-38 are indefinite in the final step (f) and (l) of claim 1 and 2 because it is unclear how the first double stranded DNA molecule is employed in the preparation of the plurality of RNA transcripts. The step is confusing because the term "employing" is not an active step and thus the role of the "first double stranded DNA molecule is unclear in the context of the claims.

(b) The claims are indefinite in the final wherein clause because a clear nexus between the steps and the wherein clause cannot be ascertained. Specifically it is unclear how wherein clause clearly defines the method steps. It is unclear how the additional features of the primers as described in the "wherein clause" modify or define the actual steps of the methods. Likewise, it is unclear how the formation of loop(s) as recited in the "wherein clause" modifies or defines the steps of the claims. MPEP states while minute details are not required in method claims, at least the basic steps must be recited in a positive, active fashion (see *ex parte Erlich*, 3 USPQ2d1011, p.1011 (Bd. Pat. Applicant. Int.1986). Accordingly, clarification is required.

Conclusion

6. No claims are allowed. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Art Unit: 1637

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
